2	info	rmation regarding said available items.
1	14.	(New) The method of claim 11 wherein said order information includes payment
2	info	rmation.

1 2	15.	(New) The method of claim 11 wherein said order information includes vehicle cation information.
1	16.	(New) The method of claim 11 further including the steps of:
2		validating said order information;
3		accepting said order information when said order information is valid; and
4		rejecting said order information when said order information is not valid.
1	17.	(New) The method of claim 16 further including the steps of:
2		transmitting acceptance information to said client device when said order is valid; and
3		transmitting error information to said client device when said order is not valid.
1	18.	(New) The method of claim 11 including the step of displaying said order information.
1	19.	(New) The method of claim 15 including the step of displaying said vehicle
2	identi	ification information.
1	20.	(New) A method for servicing a customer, said method comprising the steps of:
2 3	trans	repeatedly transmitting information about available items, said information being smitted as a wireless transmission; and

4	displaying said information about available items via a customer device positioned		
5	within range of said wireless transmission.		
1 2	21. (New) The method of claim 20 wherein said information about available items is a menu.		
1 2	22. (New) The method of claim 20 further including the step of receiving order information from said customer device.		
1 2	23. (New) The method of claim 20 further including the step of receiving aural order information from an order station.		
1	24. (New) A program product, said program product comprising:		
2	one or more programs configured to perform the following steps:		
3 4	repeatedly transmitting information about available items, said information being transmitted as a wireless transmission; and		
5 6	receiving order information from at least one customer device positioned within range of said wireless transmission; and		
7	signal bearing media bearing said one or more programs.		
1 2	25. (New) The program product of claim 24 wherein said information about available items is a menu.		

1	26.	(New) The program product of claim 24 wherein said one or more programs are	
2	further configured to perform the step of displaying said information about available items.		
1	27.	(New) The program product of claim 24 wherein said order information includes user	
2	selection	on information regarding said available items.	
1	28.	(New) The program product of claim 24 wherein said order information includes	
2		ent information.	
1	29.	(New) The program product of claim 24 wherein said order information includes	
2	vehicl	e identification information.	
1	30.	(New) The program product of claim 24 wherein said one or more programs are	
2	furthe	er configured to perform the steps of:	
3		validating said order information;	
4		accepting said order information when said order information is valid; and	
5		rejecting said order information when said order information is not valid.	
1	31.	(New) The program product of claim 30 wherein said one or more programs are	
2	furth	er configured to perform the steps of:	
3		transmitting acceptance information to said client device when said order is valid; and	
4		transmitting error information to said client device when said order is not valid.	

1 2		(New) The program product of claim 24 wherein said one or more programs are configured to perform the step of displaying said order information.
1 2	33.	(New) The program product of claim 29 wherein said one or more programs are configured to perform the step of displaying said vehicle identification information.
1	34.	(New) A program product for servicing a customer, said program product comprising:
2		one or more programs configured to perform the steps of:
3		transmitting a menu, said menu being transmitted as a wireless transmission;
4 5	wirele	displaying said menu via a customer device positioned within range of said
6		receiving order information from said customer device.
1	35.	(New) The program product of claim 34 wherein said menu is repeatedly transmitted.
1 2	36.	(New) The program product of claim 34 wherein said order information includes user tion information regarding said available items.
1 2	37.	(New) The program product of claim 34 wherein said order information includes nent information.

1 2	38. (New) The program product of claim 34 wherein said order information includes vehicle identification information.
1 2	39. (New) The program product of claim 34 wherein said one or more programs are further configured to perform the steps of:
3	validating said order information;
4	accepting said order information when said order information is valid; and
5	rejecting said order information when said order information is not valid.
1 2	40. (New) The program product of claim 34 wherein said one or more programs are further configured to perform the steps of:
3	transmitting acceptance information to said client device when said order is valid; and
4	transmitting error information to said client device when said order is not valid.
1	41. (New) The program product of claim 34 wherein said one or more programs are further configured to perform the steps of displaying said order information.
2	further configured to perform the steps of displaying ones
1 2	42. (New) The program product of claim 38 wherein said one or more programs are further configured to perform the steps of displaying said vehicle identification information.

1	43.	(New) A program product for servicing a customer, said program product comprising:
2		one or more programs configured to perform the steps of:
3	being	repeatedly transmitting information about available items, said information transmitted as a wireless transmission; and
5	posit	displaying said information about available items via a customer device ioned within range of said wireless transmission; and
7		signal bearing media bearing said one or more programs.
1 2	44. item	(New) The program product of claim 43 wherein said information about available s is a menu.
1 2 3	45. furtl devi	(New) The program product of claim 43 wherein said one or more programs are her configured to perform the step of receiving order information from said customer ce.
1	46.	(New) An apparatus for servicing a customer, said apparatus comprising:
2		a processor;
3		memory connected to said processor; and
4 5	wir	a mechanism for repeatedly transmitting information about available items via a eless transmission.
	Do	cket No. RO998-238

Serial No. 09/238,821

1	47. (New	w) The apparatus of claim 46 wherein said wireless transmission is received by a	
2	customer device that is within range of said wireless transmission and wherein said		
3	information about available items is thereupon displayed.		
1 2	48. (Ne menu.	w) The apparatus of claim 47 wherein said information about available items is a	
1		ew) The apparatus of claim 47 further including a mechanism for receiving order	
2	information	n from said customer device.	
1	50. (No	ew) A customer device, said customer device comprising:	
2	a p	rocessor;	
3	me	emory connected to said processor;	
4	a r	nechanism for receiving a repeatedly transmitted wireless transmission regarding	
5	information about available items, said transmission being received when in range of said		
6	transmissi	on;	
7	a 1	mechanism for displaying said information; and	
8	a :	mechanism for transmitting order information, said order information being based	
9		information about available items.	

1	51.	(New) An apparatus for servicing a customer, said apparatus comprising:
2		a processor;
3		memory connected to said processor;
4 5	said v	a mechanism for repeatedly transmitting a menu via a wireless transmission wherein vireless transmission is designed to be received by a customer device; and
6 7	inform	a mechanism for receiving order information from said customer device, said order mation being generated based upon said menu.
1	52.	(New) A customer device, said customer device comprising:
2		a processor;
3		memory connected to said processor;
4 5	a me	a mechanism for receiving a repeatedly transmitted wireless transmission regarding nu, said transmission being received when in range of said transmission;
6		a mechanism for displaying said menu; and
7 8	upoi	a mechanism for transmitting order information, said order information being based a said information about available items.
